

HEATEX MODEL E - LARGE ROTOR

To meet the increasing demand for oversized, high-performance rotors, we have developed a new casing for our large wheels (approx. Ø1501-Ø2575). The result is our most versatile and reliable rotary heat exchanger to date.

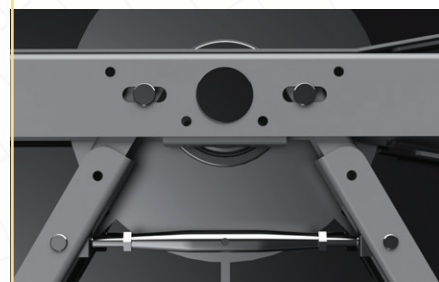

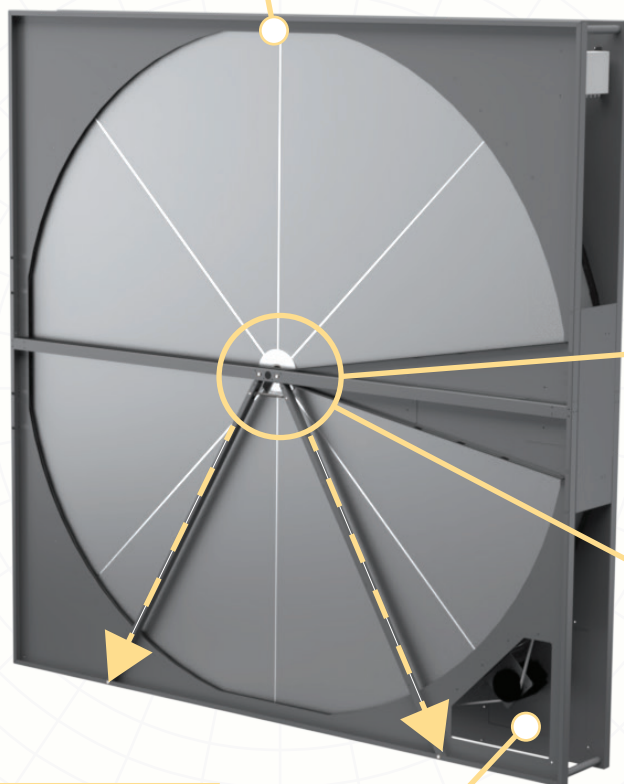

**NEW
DESIGN**

Slide-In Solution

Structurally self-supportive casing. No attachments needed inside the AHU.

Wheel Tilt Function

Patent pending solution to minimize friction, leakage and wear.

Diagonal Motor Mount & Large Inspection Hatch

For easy access and service of the motor, belt and pulley.

Even Load Distribution

For reduced mechanical requirements on the AHU.

• High-Efficiency Matrix

Numerous well heights and materials available

• Compact Casing

For a snug fit in any AHU (wheel dia. + 50 mm)

• Flexible Wheel Diameters

For optimized performance versus cost

• Custom Casing Dimensions

For perfect fit in any AHU

Your Benefits with Heatex Model E

- Optimized performance to cost
- Easy installation and maintenance
- Reliable operation
